

JOSHUA KIMANI NGIGI

kimaningigijoshua@gmail.com | +254797390822 | Nairobi, Kenya

Summary

Dynamic full-stack software developer specializing in scalable web applications and cloud integration. Leverages expertise in React, Node.js, and API design to create data-driven platforms. Actively contributes to performance optimization and troubleshooting in Agile settings, ensuring user satisfaction and efficient system functionality.

Skills

- **Frontend Development:** React, TypeScript, JavaScript, Tailwind CSS
- **Backend Development:** C#, C++, Python, Java, PHP(Laravel), Express.js, Node.js
- **Databases:** Microsoft SQL Server, PostgreSQL, MySQL, MongoDB, SQL queries
- **Cloud, Deployment & DevOps:** Docker, Vercel, Render, Netlify, Cloud Integration & Services, Cloudinary
- **Development Tools & Testing:** Git, GitHub, Postman, Chrome Developer Tools, Version Control, API testing
- **Architecture & System Engineering:** System Administration, API Design & Integration, System Optimization
- **Soft Skills & Problem Solving:** Troubleshooting, Debugging Skills, Technical documentation, Customer communication

Experience

Intern as a System Support Staff (01/2026 – 06/2026)

Embu County Revenue Authority | Embu, Kenya

- Delivered first-line technical support for the eService platform. Investigated user-reported software issues and gathered detailed information to reproduce problems.
- Escalated bugs and technical concerns to senior developers, ensuring each case was accompanied by clear, thorough documentation to facilitate swift resolution.
- Assisted users with system navigation, troubleshooting, and feature usage while identifying recurring issues and suggesting improvements to the development team for enhanced platform performance and user experience.

Software Developer Attaché (09/2025 – 12/2025)

Teach2Give | Embu, Kenya

- Completed a 3-month hybrid boot camp focused on full-stack application development using React (TypeScript), Redux Toolkit, RTK Query, Tailwind CSS, Node.js, Hono.js, Express.js, Mux, Cloudinary, and OpenAI 2.0.
- Built scalable web applications and integrated cloud services, enhancing skills in API design, state management, and modern frontend development.
- Developed SQL queries to retrieve, validate, and troubleshoot application data in MySQL databases, ensuring data integrity and reliability.

Intern as a System and Network Administrator (05/2024 – 08/2024)

Kiambu Level 5 Hospital | Kiambu, Kenya

- Implemented a new system launched at Kiambu Level 5 Hospital to support the delivery of quality healthcare services and promote accountability.
- Supported network infrastructure and guided staff in transitioning to the new system.
- Collaborated in troubleshooting and resolving deployment bugs and errors to ensure system stability.

Education

BS: Computer Science (08/2025)

University of Embu | Embu | GPA: Second Class Upper Division

KCSE CERTIFICATE (10/2019)

William Ngiru Gitu High School | Kiambu | GPA: Grade B
